TENNIS COURT EQUIPMENT

➤ The leaders in design and manufacture of Quality Assured products

COURT CURTAINS AND WIND SHIELDS

13000 Court divider curtain

Tennis curtains can greatly improve the amount of time on the court by stopping balls going out of play. The curtains are also used to replace traditional wire fences because they open up the area for other uses and do not detract from other areas such as gardens and entertainment areas.

The standard curtains are made from 50mm Square ultra violet treated nylon black netting. The curtains bordered by one inch black vinyl tape stitched to the net. The curtain incorporates brass eyelets along the top every 50cm and lead rope is stitched into the bottom to weigh the net down. The curtain is hung by 6mmx7/19 galvanised wire with shackles connecting the net to the wire. The rigging includes turnbuckles and shackles.

The curtains are custom made and can be made to any size or style. The system can be incorporated into any surrounding. The curtains can also be made from vinyl to create a visual barrier and is available in white for indoor use.

13010 Storage Box System

Storage boxes are used to protect the curtain from the elements and from vandalism. Inside the Storage box is a winch that is used to remove the net for maintenance and to maintain the tension on the wire. The winch is operated by a removable winch handle from outside of the box to the left side of the door.

The curtain simply slides into the box and is safely stowed away in minutes and locked up protecting your investment.

The boxes are black powder coated or galvanised and include a lock and keys

13020 Wind shield/privacy screen

13025

Made to be erected along the fence line of the court greatly improves the quality of play by reducing the wind speed onto the court. It also aids in the concentration of players creating privacy from road traffic and neighbours used as a back drop it makes the ball stand out from the dark screen rather than getting lost against the green foliage of a garden.

Made from ultra violet protected fabric. Include eyelets every one meter. Standard heights are 2.0 metres and 2.5 metres high and 6 meters long segments. Standard colours are black and dark green. Privacy screens can be made to any length and height.

13030 Printed Letters

Printed letters can also be added to the screens. Letters are 60cm in height.

Logos

Corporate logos can be included in the privacy screens for sponsorship events and corporate funding.

Edwards Classic Tennis Posts

1800mm x 220mm x 100mm 16.0kg

Glossary

Hot Dipped Galvanised

A highly durable zinc coating which is
applied under extreme heat to unprotected
steel. Applied to Australian Standards.

Supergal/Allgal

Supergal/Allgal is a cold formed product
made from highly durable pre-galvanised
steel strip.

Powder Coated

A highly durable polyester which is applied electrostatic-ally in a cold powder form then oven baked at 195c for maximum adhesion.

Standards

Most of the Equipment in this catalogue complies with International Tennis Federation rules.

All steel coatings are applied to Australian Standards.

About Us

We are a long established family owned business that has supplied the sport and leisure industry for over 80 years. We are market leaders in our field and maintain this through providing quality goods and satisfaction to customers with superior backup services. Quin Sports and Nets is now under the direction of Adam Quin, the third generation of Quin's.

Quin Sports and Nets is an Australian wide distributor, supplying high quality nets & posts for schools, recreation centres, clubs, councils and homes. We specialise in all types of netting and posts including soccer, tennis, lacrosse, cricket, hockey, volleyball, baseball, softball, basketball

and golf, as well as manufacturing scramble net, safety net, animal enclosure nets and anti-bird netting. Our tennis nets come with the recommendation of Tennis SA.

Quin Sports and nets manufacture custom made netting to your specifications, including the design, manufacture and installation, from start to finish. Adopting a Quality Management System has helped us establish ourselves as market leaders in our field and our aim is to maintain this through providing quality goods and satisfaction to customers.

Tradition with Innovation

Quin Sports opened its doors in 1961 and was started by Hugh Quin. It supplied clubs, schools and sportsmen with a wide range of equipment. During the first few decades of the company's history it focused on supplying domestic and foreign coast fishing fleets and ocean going fishing vessels with fishing nets and ropes of all kinds. We also operated Quin Canvas Goods, winning Government and Army tenders for covers and tents. The development of sporting equipment for gymnasiums, sports complexes and stadiums has steadily increased with improvement in the venues and focus on individual's performances and their equipment.

State of the Art Manufacturing Techniques

Quin Sports are the suppliers of the worlds most advanced netting from knot-less to knotted. All nets are made from the highest UV rating for protection in the Australian climate. Assembly techniques have been gained from experience in the deep sea fishing industry. We invest in the latest machinery to maintain a high quality product at competitive prices.

Professional Installation

Quin's maintain a professional team of experts with many years of installation experience. We provide this service world wide and have worked as far as USA, Mexico, Singapore and United Arab Emirates.

Maintenance

Quin Sports and Nets understand the need for our equipment to last as long as possible. We run an in-house maintenance service on all equipment we sell, the advantage of this being many more years of usage as we can repair worn or damaged equipment before the cost of repair outweighs the cost of replacement.

Services

Planning – Quin's staff offer a free planning service to work closely with customers, architects and builders in the planning process to overcome design concerns and tailor our equipment to suit any application.
