SOCCER FIELD EQUIPMENT

The leaders in design and manufacture of Quality Assured products

Soccer Football Nets

All Quin Sports football nets conform to AS 4866.1 and the FA Guidelines for small sided goals.

These standards specify a minimum twine diameter of 2mm and a maximum mesh size of 120mm.

A free information pack on safety and maintenance is available on request.

For your copy, call 0411505465.

Custom made Soccer nets

- 14040** any size or colour

Netting Per Square metre

- 14042** 120mm 4mm polyethylene twisted twine. Colour ,White

Goal post safety has always been an issue of importance. In 2005 the Product and Safety Committee from The Office of Fair Trading undertook a project to increase the awareness of safety and to offer guidance on proper maintenance when using and handling Soccer goal equipment. The outcome of this was the Australian Standard 4866.1

We are constantly trying to design safety into our designs.

Our extensive range of aluminium goals for example, has been designed with safety and ease of movement in mind.

Soccer Goals Senior

Steel Socketed Goals

Standard Steel Socketed Goals

60mm OD tubular steel. Set of 2 goals complete with sockets. Powder coated white.

- 2760 Senior**
7.32 x 2.44m (24' x 8')

- 2762 Junior**
6.4 x 2.13m (21' x 7')

Heavyweight Steel Socketed Goals

Parks quality 76mm OD.

- 2759 Senior**
7.32 x 2.44m (24' x 8')

Mobile Ball Stop Safety Systems

Fixed ball stop and fencing systems can be expensive and leave little room for a change of heart.

Optimise the use of your valuable sports ground space with the new Movable Ball Stop.

We are now developing a non-permanent ball stop system that helps to maximise pitch

care but does not cost the earth.

Standard size 6m height x 40m length (penalty box width) - other sizes available on request. Movable anchors fitted with 360° rotational wheels for easy movements. Anchors fitted with telescopic outriders and locking pins for stability. 120mm mesh net made from high density polyethylene (U.V. Stabilised). A MBS6X40 6m x 40m

4 Aluminium masts

4 Steel based with wheels White

120mm mesh netting

Boundary Safety Back Netting

5m high x 14m wide including 80mm diameter posts. Now popular with futsal sports fields.

B80mm square box section galvanised post complete with pigtails and socket.

14142 4m high x 80mm with socket

14143 5m high x 80mm with socket

14144 6m high x 80mm with socket

Anchor fittings for free-standing goals.

The Range of Anchor fitting is critical to the use of free standing goals and is a mandatory condition of the Australian Safety Standard.

14146 Ground Hoop Anchor

16mm Steel powder coated green

14147 Ground Anchor J

16mm Steel powder coated green.

14148 Sand Bag

Blue pvc filled with sand

Holds the goal firmly on the ground.

Total weight 2.5 kg when filled.

14150 Corner past and flag

Spiked Steel pole, orange flag.

14155 lashing Hook

Nylon hook used to hook the net to the goals.

14157 Velcro Ties

Double sided Velcro ties to tie the nets to the goals. 300mm long.

About Us

We are a long established family owned business that has supplied the sport and leisure industry for over 80 years. We are market leaders in our field and maintain this through providing quality goods and satisfaction to customers with superior backup services. Quin Sports and Nets is now under the direction of Adam Quin, the third generation of Quin's.

Quin Sports and Nets is an Australian wide distributor, supplying high quality nets & posts for schools, recreation centres, clubs, councils and homes. We specialise in all types of netting and posts including soccer, tennis, lacrosse, cricket, hockey, volleyball, baseball, softball, basketball

and golf, as well as manufacturing scramble net, safety net, animal enclosure nets and anti-bird netting. Our tennis nets come with the recommendation of Tennis SA.

Quin Sports and nets manufacture custom made netting to your specifications, including the design, manufacture and installation, from start to finish. Adopting a Quality Management System has helped us establish ourselves as market leaders in our field and our aim is to maintain this through providing quality goods and satisfaction to customers.

Tradition with Innovation

Quin Sports opened its doors in 1961 and was started by Hugh Quin. It supplied clubs, schools and sportsmen with a wide range of equipment. During the first few decades of the company's history it focused on supplying domestic and foreign coast fishing fleets and ocean going fishing vessels with fishing nets and ropes of all kinds. We also operated Quin Canvas Goods, winning Government and Army tenders for covers and tents. The development of sporting equipment for gymnasiums, sports complexes and stadiums has steadily increased with improvement in the venues and focus on individual's performances and their equipment.

State of the Art Manufacturing Techniques

Quin Sports are the suppliers of the worlds most advanced netting from knot-less to knotted. All nets are made from the highest UV rating for protection in the Australian climate. Assembly techniques have been gained from experience in the deep sea fishing industry. We invest in the latest machinery to maintain a high quality product at competitive prices.

Professional Installation

Quin's maintain a professional team of experts with many years of installation experience. We provide this service world wide and have worked as far as USA, Mexico, Singapore and United Arab Emirates.

Maintenance

Quin Sports and Nets understand the need for our equipment to last as long as possible. We run an in-house maintenance service on all equipment we sell, the advantage of this being many more years of usage as we can repair worn or damaged equipment before the cost of repair outweighs the cost of replacement.

Services

Planning – Quin's staff offer a free planning service to work closely with customers, architects and builders in the planning process to overcome design concerns and tailor our equipment to suit any application.
