# BIRD EXCLUSION NET SYSTEMS

➤ Environmental  
solutions from  
Quins Nets

# Proven Track record in large scale bird exclusion

Our netting is the proven long term solution, in trouble sites that are hard to reach such as:

- Under bridges
- Loading docks
- Plane hangers
- Over air conditioning units
- Roof tops

Over the years, people have tried various methods of removing pigeons, either by trapping or shooting and whilst this is effective to a small number, more birds always return to roost.

We believe that the polyethylene netting we supply is the only 100% effective answer in many cases.

## 6 reasons why you should use Quins anti bird nets

Quin Sports & Nets has introduced an Anti Bird Net package which includes the design, supply and installation of netting to areas affected by pigeons and other nuisance birds. Maintenance contractors, builders and Property Managers use us because we offer wholesale prices direct from the factory with no middle man.

We specialise in large areas in hard to reach locations that make it difficult and uneconomical to shoot or trap.

Our staff operate in all areas of Australia.

Due to our years of experience we are able to complete jobs much faster and to a better standard than our competitors.

Our system is specifically made for use in the hot, windy and wet conditions of Australia where the UV light levels are extreme.

To give you a better level of service all our products and installations are covered by a limited liability and adhere to all relevant license requirements.

As ticketed scissor lift operators, we can install the netting system quickly and safely, and our installation staff are able to work in difficult to access areas and at heights where birds usually sit or nest.

If you would like our staff to inspect your site and advise you on your requirements, please do not hesitate to contact us. Quin's also offer a repair service to existing structures.

## Technical Information

### Quins Netting

Our netting is made from the highest quality high density polyethylene which resists abrasion and is rot proof.

The knots of the netting are heat set at the factory so that the mesh size is uniform and the knots do not move. The net is chemically treated to withstand our harsh UV conditions.

### 83329 Net and wire hooks

The net hooks are made from high grade 316 stainless steel.

They are ideal for use with TEK screws to fix into wood and steel or dynabolts into concrete .

### 83334 Galvanized wire clamp

For fixing wire to structures with tech screws and dynabolts.

### 83019 Stainless Steel Wire

Flexible 316 wire 5/16 2.0mm diameter. Used to border the outer edge of the netting. Sold by the meter

We offer two options for erection of the netting

- A full installation service
- DIY kits and instructions

# About Us

We are a long established family owned business that has supplied the sport and leisure industry for over 80 years. We are market leaders in our field and maintain this through providing quality goods and satisfaction to customers with superior backup services. Quin Sports and Nets is now under the direction of Adam Quin, the third generation of Quin's.

Quin Sports and Nets is an Australian wide distributor, supplying high quality nets & posts for schools, recreation centres, clubs, councils and homes. We specialise in all types of netting and posts including soccer, tennis, lacrosse, cricket, hockey, volleyball, baseball, softball, basketball

and golf, as well as manufacturing scramble net, safety net, animal enclosure nets and anti-bird netting. Our tennis nets come with the recommendation of Tennis SA.

Quin Sports and nets manufacture custom made netting to your specifications, including the design, manufacture and installation, from start to finish. Adopting a Quality Management System has helped us establish ourselves as market leaders in our field and our aim is to maintain this through providing quality goods and satisfaction to customers.

### Tradition with Innovation

Quin Sports opened its doors in 1961 and was started by Hugh Quin. It supplied clubs, schools and sportsmen with a wide range of equipment. During the first few decades of the company's history it focused on supplying domestic and foreign coast fishing fleets and ocean going fishing vessels with fishing nets and ropes of all kinds. We also operated Quin Canvas Goods, winning Government and Army tenders for covers and tents. The development of sporting equipment for gymnasiums, sports complexes and stadiums has steadily increased with improvement in the venues and focus on individual's performances and their equipment.

### State of the Art Manufacturing Techniques

Quin Sports are the suppliers of the worlds most advanced netting from knot-less to knotted. All nets are made from the highest UV rating for protection in the Australian climate. Assembly techniques have been gained from experience in the deep sea fishing industry. We invest in the latest machinery to maintain a high quality product at competitive prices.

### Professional Installation

Quin's maintain a professional team of experts with many years of installation experience. We provide this service world wide and have worked as far as USA, Mexico, Singapore and United Arab Emirates.

### Maintenance

Quin Sports and Nets understand the need for our equipment to last as long as possible. We run an in-house maintenance service on all equipment we sell, the advantage of this being many more years of usage as we can repair worn or damaged equipment before the cost of repair outweighs the cost of replacement.

### Services

Planning – Quin's staff offer a free planning service to work closely with customers, architects and builders in the planning process to overcome design concerns and tailor our equipment to suit any application.
