➤ The leaders in design and manufacture of Quality Assured products

# POOL & POND SAFETY NET SYSTEM

## Reasons why you should use Quin's Pool and Pond Nets

Safer than some pool covers: No child has ever drowned in Australia when a pool safety net has been correctly installed. PVC pool covers can collect water on the surface that children could drown in.

### Ease of use:

The net can be installed in five minutes, is light to carry and neatly stores away when storage roller is used.

**Unobtrusive:** The net will not hold pools of water that children could drown in. The pools character is still maintained.

**Highest Quality:** Quin's pool nets use only the highest quality netting and components designed to withstand the most extreme Australian conditions.

### Saves water:

Used in conjunction with a solar blanket the pool can save water but still be safe. Without the net, children and pets can unwittingly step on the cover and slide unseen under the cover.

### Protects Animals:

Stops wildlife and pets drowning in the pool or pond.

### Controls unwanted Ducks and birds:

Reduces bird droppings and stops ducks and shags eating fish. Duck droppings also foul the pool and make surfaces slippery under foot.

## Frequently asked Questions

### Will the net hold my child:

If installed correctly the net will hold a small child at the edge. As the child moves out from the edge it finds that the net is unfamiliar and unstable and is unable to find a firm footing.

### Will the chlorine in the pool damage the net:

The net is made from polyethylene which is naturally resistant to salt and chlorine.

### Can my child interfere with the workings of the net:

Small children do not have the skill or the strength to tamper with the net system.

### When the pool cleaner is working will we still be able to have the net safely secured:

All cleaning systems will clean the pool with the net on.

### How long will the net last:

On average the net is good for ten years.

### Does the safety net take the place of a pool fence:

Pool fences are mandatory in most areas and should not be removed in place of the netting.

## How To Order

At Quin's we offer two options for the installation of our pool nets.

Installation by a Qualified Quin's installer.

DIY kits only for regular shaped pools and ponds.

## Technical Information

### Quins Pool Netting

Our netting is made from the highest quality high density polyethylene which resists abrasion and is rot proof.

The knots of the netting are heat set at the factory so that the mesh size is uniform and the knots do not move. The net is chemically treated to with stand our harsh UV conditions.

### Quins Pulleys tension system

The central pulley block system is made from no less than eight nylon pulleys with 316 stainless steel sleeves. Pulling the rope on the system closes the centre of the ring tightening the net until it is very tight.

### Recessed Anchors

Quins pool nets are secured with nylon inserts fixed into the perimeter of the pool 60cm apart and 35cm from the pools edge. The nylon insert is inserted flush with the concrete using a 13mm drill bit. Around the pools border. Available in black and off white.

### Fasteners

The net is fastened into the nylon inserts using precision Engineered high grade stainless steel .

### DIY installation

DIY kits are only available to pool owners who have regular shaped pools and ponds.

Easy to understand installation manual and user guide are supplied with the netting.

# About Us

We are a long established family owned business that has supplied the sport and leisure industry for over 80 years. We are market leaders in our field and maintain this through providing quality goods and satisfaction to customers with superior backup services. Quin Sports and Nets is now under the direction of Adam Quin, the third generation of Quin's.

Quin Sports and Nets is an Australian wide distributor, supplying high quality nets & posts for schools, recreation centres, clubs, councils and homes. We specialise in all types of netting and posts including soccer, tennis, lacrosse, cricket, hockey, volleyball, baseball, softball, basketball

and golf, as well as manufacturing scramble net, safety net, animal enclosure nets and anti-bird netting. Our tennis nets come with the recommendation of Tennis SA.

Quin Sports and nets manufacture custom made netting to your specifications, including the design, manufacture and installation, from start to finish. Adopting a Quality Management System has helped us establish ourselves as market leaders in our field and our aim is to maintain this through providing quality goods and satisfaction to customers.

### Tradition with Innovation

Quin Sports opened its doors in 1961 and was started by Hugh Quin. It supplied clubs, schools and sportsmen with a wide range of equipment. During the first few decades of the company's history, it focused on supplying domestic and foreign coast fishing fleets and ocean going fishing vessels with fishing nets and ropes of all kinds. We also operated Quin Canvas Goods, winning Government and Army tenders for covers and tents. The development of sporting equipment for gymnasiums, sports complexes and stadiums has steadily increased with improvement in the venues and focus on individual's performances and their equipment.

### State of the Art Manufacturing Techniques

Quin Sports are the suppliers of the worlds most advanced netting from knot-less to knotted. All nets are made from the highest UV rating for protection in the Australian climate. Assembly techniques have been gained from experience in the deep sea fishing industry. We invest in the latest machinery to maintain a high quality product at competitive prices.

### Professional Installation

Quin's maintain a professional team of experts with many years of installation experience. We provide this service world wide and have worked as far as USA, Mexico, Singapore and United Arab Emirates.

### Maintenance

Quin Sports and Nets understand the need for our equipment to last as long as possible. We run an in-house maintenance service on all equipment we sell, the advantage of this being many more years of usage as we can repair worn or damaged equipment before the cost of repair outweighs the cost of replacement.

### Services

Planning – Quin's staff offer a free planning service to work closely with customers, architects and builders in the planning process to overcome design concerns and tailor our equipment to suit any application.
